

I fully support RM-10867 as proposed by the American Radio Relay League regarding amateur radio license restructuring. The Leagues proposal is consistent with the basis and purpose of the amateur radio service.

I hold the art of Morse Code and its practitioners in high regard, but in the final analysis, it is just one of the many modes that we can choose in this service. The vast diversity of operating modes is but one of the many attractions and strengths of this service.

I respectfully ask the FCC to act on this proposal as expeditiously as possible.

Thank you for allowing me to present my point of view.

73 . . . John Terry . . . N2NDJ

Thank you for your consideration of this input.
